The Group of INTER RAO Lietuva (hereinafter – “the Group”) is an independent supplier of electricity and, as such, may engage in various forms of electricity trading. Moreover, the Group is also present in electricity generation operations, as it owns a wind farm in Western Lithuania.

The Group is engaged in various forms of electricity trading: the purchase and sale of electricity under bilateral contracts with other electricity suppliers, as well as on the power exchange; supply of electricity to end-users; provision of balancing services for end-users and other wholesalers of electricity; sale and purchase of regulating and balancing electricity for the transmission system operators; cross-border electricity trading.

The Group has permission to import and export electricity to and from Lithuania, it is engaged in the import of electricity from Russia and, to a lesser extent, from Belarus, as well as in export to these countries. The Group is also active in cross-border electricity trading between Lithuania and other EU Member States, namely Latvia and Estonia.

The Group sells all of the electricity it cross-border from the third countries to the Lithuanian internal market on the power exchange since, in accordance with respective regulations, all electricity cross-border delivered to the Lithuanian internal electricity market has to be sold on the power exchange. Then the Group buys the electricity on the power exchange in a volume corresponding to its contractual obligations with clients. Sale and purchase orders are submitted for the same prices and trades are executed at the market price. Some portion of electricity is also sold through Nord Pool AS in Lithuania to other market participants. Trades on the power exchange are executed at the market price.

The price of electricity sold under bilateral contacts is the market price, adjusted for variances depending on the electricity trading or consumption pattern of the customer and contractual arrangements (e.g., fixed on annual or monthly basis or agreed in daily delivery schedules).

Apart from importing electricity, the Group also purchases the electricity from other wholesalers of electricity in Lithuania and Latvia under bilateral contracts based on various pricing arrangements, as well as on Nord Pool AS in Lithuania, Latvia and Estonia.

The Group is also present in the electricity trading market in Poland, where it started its operations in 2014 and is involved in buying and selling electricity on the Polish Power Exchange.
